

January 2024 Math Challenge

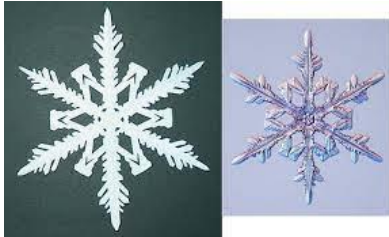

Kindergarten

How many snowflakes are in this picture?

Grade 1

Sabrina watched three snowflakes fall onto a leaf. She noticed that each snowflake had six points. How many points did she see on the leaf?

Grade 2

27 snowflakes fell on Wendy's coat and 84 snowflakes fell on Wendy's boots. How many snowflakes fell all together?

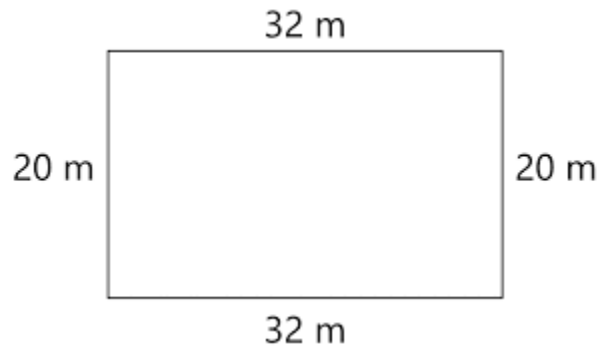

Grade 3

Jamie is ice skating on a frozen pond. She is practicing doing twirls. Every time she twirls, she spins two times. If she spins 56 times, how many times did she twirl?

Grade 4

Helen went out for a walk through the snowy woods. She knew that snowflakes usually had six points. She started counting points as she was walking. She counted 66 points on one plant. How many snowflakes did she see?

Grade 5 - Find the area of this block of snow.

Grade 6 - Find the volume of this package.
